REPORT

ON THE

RAIL-BORNE TRAFFIC OF BENGAL

During the year 1896-97.

THIS report, the thirteenth of its kind, furnishes statistics of the total trade, external and internal, of the Lower Provinces of Bengal, carried by rail during the year 1896-97 as registered under the block system. It is based on returns

Assistant Auditor, East Indian Railway, Jamalpur.

Examiner, Guaranteed Railway Accounts, Bombay.

Auditor and Examiner, Bengal North-Western and Tirhut Railways, Gorakhpur.

Auditor, Oudh and Rohilkhand Railway, Lucknow.

Examiner of Accounts, North-Western Railway, Lahore.

Examiner of Accounts, Eastern Bengal State Railway System, Sealdah (Calcutta).

Auditor, Bengal-Nagpur Railway.

furnished by the officers named in the margin, and on the following Reports, viz., the Report on the earnings of the East Indian Railway Company; the Reports by the Collector of Customs, Calcutta; the Report by the Railway authorities on trade fluctuations and changes in railway freights; the section relating to weather and crops in the General Administration Reports submitted to Government by Commissioners of Divisions; the weather and crop report of the Director of Land Records and Agriculture, Bengal; and the trade valuation statements received from four selected marts, the Collector of Customs, Calcutta, the Board of

Revenue, L.P., the Calcutta tea and indigo brokers, and from the several Local Governments and Administrations in India.

2. Under the instructions of the Director-General of Statistics, the following changes were made in the classification of articles during 1896-97 :—

FORMER CLASSIFICATION.	REVISED CLASSIFICATION.
<i>Metals.</i>	<i>Metals.</i>
(5) Iron.	(5) Iron and steel— (a) Cast iron. (b) Unwrought. (c) Wrought. (d) Manufactures of iron and steel.
<i>Dyes and tans.</i>	<i>Dyes and tans.</i>
(5) Aniline dyes.	(5) Alizarine and aniline dyes.

The undermentioned new heads were also opened—

Hemp and other Fibres.

Treasure.

(1) Gold coin and bullion.

(2) Silver coin (Government rupees).

(3) Silver bullion (viz., bars, ingots and coins other than current coin of the Government of India).

3. The values of all the articles of trade specified in the valuation statement appended to this Report have been assigned according to the system explained in paragraph 3 of the Report for 1893-94. In the case of "Alizarine and aniline dyes," however, the Director-General of Statistics has decided that, as the trade in aniline dye is far more important in the Lower Provinces than that in alizarine dye, the value rate of the former should be taken as the basis of the valuation of the trade in mineral dyes in the trade returns of Bengal. This has accordingly been done in the returns under review.

4. No measures were taken during the year for the registration of inland trade of Bengal other than that dealt with in the river-borne traffic report.

CHAPTER I.

GENERAL SUMMARY OF THE SEASONS AND RESULTS OF THE HARVESTS AND NOTICE OF PRICES.

In the month of April there was an almost entire absence of rainfall in these Provinces, except in East Bengal. In May, showers were of daily occurrence in North and East Bengal, and the monthly fall was in excess of the normal. In South-West Bengal and Bihar the rainfall was practically normal, but in Orissa and Chota Nagpur it was below the normal. The rainfall received in June was much more copious in the South than in the North of the Province—a result chiefly due to cyclonic storms in the Southern districts in the latter half of the month. In South-West Bengal, Orissa and Chota Nagpur, the rainfall was above the normal; in North Bengal it was less than half the normal, and in Bihar slightly less than the normal. The rainfall in July, was badly distributed but did not differ to a large extent from the normal, except in East Bengal, where the fall was noticeably short. In August, the rainfall was deficient throughout these Provinces, except in Orissa. In the first week of September there was general rain in all parts of these Provinces, except in Bihar, where only light scattered showers were reported. In the second week of September the deficiency of rain continued in Bihar, but the rainfall was general in all other parts of the Province. In October the rainfall was everywhere deficient; no district received as much as an inch of rain except Jalpaiguri, Darjeeling, Rangpur and Chittagong.

The *bhadol* season of 1896 was very unfavourable, being characterised by short rainfall in all parts of these Provinces except in Orissa, where the rainfall was excessive in July and August, resulting in the destruction by floods of the standing crops over a large area. Out of 43 districts from which reports were received by the Director of the Agricultural Department only 1 district, viz., Tippera, reported a full average *bhadol* crop; 8 districts reported the crop to be from 12 to 14 annas; 27 districts, from 8 to 12 annas, and 7 districts, at less than 8 annas. On the whole, the Agricultural Department estimates that the yield of the *bhadol* crops generally for these Provinces did not exceed $10\frac{1}{2}$ annas, while the yield of the *bhadol* food-crops alone did not, perhaps, exceed $9\frac{1}{2}$ annas of a full average crop, against 14 annas in 1895-96.

The winter rice crop of 1896 suffered very seriously from the deficient rainfall of July and August and the early cessation of the monsoon in the middle of September; in Cuttack the crop over a large area was destroyed by flood in July and August. Out of 45 districts, only one district, viz., Bogra, returned a crop as much as 12 annas; 8 districts estimated it at 10 to 12 annas; 15 districts, between 8 and 10 annas; 12 districts, between 6 and 8 annas; 4 districts, between 4 and 6 annas, and the remaining five districts at less than four annas. For the Lower Provinces, as a whole, the outturn of the crop is estimated by the Agricultural Department at only $7\frac{1}{2}$ annas, against 13 annas in 1895-96.

The *rabi* crops of 1896-97 suffered very badly at the time of sowing from want of moisture in the soil, due to the deficient rainfall during the previous monsoon, and the entire cessation of rain in October and the greater part of November. Showers were, however, received at intervals during the cold weather of 1896-97, which did much good in Bihar and in Chota Nagpur. Out of the 45 districts from which returns were received by the Agricultural Department only one district, viz., Gaya, returned an average or 16-anna crop; 6 districts returned crops varying from 12 to 14 annas; 22 districts, from 8 to 12 annas, and 16 districts at less than 8 annas. The Agricultural Department estimates that on the whole the outturn of the *rabi* food-crops averaged $10\frac{1}{3}$ annas against $11\frac{1}{2}$ annas in 1895-96.

2. Owing to a deficiency of rainfall in July and August 1896, the mean outturn of the jute crops is calculated by the Agricultural Department to have averaged 12 annas as against $15\frac{1}{3}$ annas in 1895-96. Of the eleven principal jute-producing districts, only two, viz., Rajshahi and Purnea returned a 15-anna crop, only one (Tippera), a 14-anna crop, and in the rest the crop varied from 10 to 12 annas.

On account of the early cessation of the monsoon of 1895 and the scantiness of the showers in the early months of 1896, moisture was generally deficient in the indigo districts at the time of sowing. In May, rainfall was generally normal, but from that month onwards rain was deficient in most of the indigo-growing districts. In Bihar the first cuttings were poor, but the dry weather gave unusually good second cuttings (*Khunti*). The outturn for the whole Province is estimated by the Director of the Agricultural Department at 14 annas against $18\frac{1}{2}$ annas in 1895-96.

The want of rain in the beginning of the cold weather of 1895-96 affected this crop also. The outturn in Rungpur, which is the chief tobacco-growing district in the Lower Provinces, was the same as in 1895-96, viz., 16 annas. On the whole, the outturn is estimated by the Agricultural Department to have been very slightly below that of 1895-96, viz., 12 annas against 13 annas in the previous year.

The climatic conditions which affected the *rabi* crops also affected the sugarcane crop, the outturn being $12\frac{3}{4}$ annas against $13\frac{1}{2}$ annas in 1895-96.

Though the poppy crop also suffered from the absence of rainfall at the sowing time, the outturn has been estimated by the Agricultural Department at $13\frac{3}{4}$ annas against $12\frac{3}{4}$ annas in 1895-96.

Owing to the drought the ganja plants became infested with pests and though the area brought under cultivation was larger than in 1895-96 the produce was slightly smaller.

3. A detailed statement giving the outturn of the above crops, district by district, is appended to this report.

In every district in these Provinces, except Hooghly, Dacca, Mymensingh, and Singhbhum, the price of common rice on the 31st of March 1897 was at least 33 per cent. higher than it was on the corresponding date of the previous year. In Hooghly, the price of common rice was 20 per cent. higher, in Dacca 27 per cent., in Mymensingh 25 per cent., and in Singhbhum 31 per cent. The price ranged from 13 seers 2 chitaks per rupee in Puri to 7 seers 15½ chitaks per rupee in Monghyr. In only 7 out of the 46 districts was the price more than 10 seers per rupee.

CHAPTER II.

EXTERNAL TRADE OF BENGAL.

STATEMENT II.

As compared with the previous year, the trade of Bengal with other provinces of India registered on the railways during the year 1896-97, was as follows:—

		1895-96.		1896-97.	
		Quantity. Mds.	Value. Rs.	Quantity. Mds.	Value. Rs.
Imports into Bengal	...	1,35,95,603	12,11,48,459	1,11,51,996	13,17,54,909
Exports from Bengal	...	2,26,63,558	9,65,22,682	2,71,64,380	12,13,31,299
Total	...	3,62,59,163	21,76,71,141	3,83,16,376	25,27,86,208

While the import traffic showed a decrease of 24,43,606 maunds, or 17·97 per cent. as compared with the figure for 1895-96, the export traffic showed a large increase of 45,00,822 maunds, or 19·86 per cent., the net result in the gross traffic carried both ways being an increase of 20,57,216 maunds, or 5·67 per cent. The articles which showed the largest increase in the import traffic were salt (2,88,450 maunds), iron (84,748 maunds), shell-lac (66,650 maunds), and poppy seed (63,385 maunds), and those which showed the heaviest decrease were wheat (13,81,317 maunds), rape and mustard seed (12,11,478 maunds), gram and pulse (11,51,774 maunds), linseed (5,74,943 maunds), and castor seed (91,678 maunds). In the export traffic, the greatest increase took place in gram and pulse (28,99,108 maunds), rice not in the husk (28,88,467 maunds), rice in the husk (3,19,133 maunds), jowar and bajra (1,12,542 maunds), other food grains (11,89,644 maunds), and unmanufactured tobacco (1,45,048 maunds). The articles which showed a considerable falling off were coal and coke (30,01,359 maunds), gunny bags and cloth (2,00,584 maunds), kerosine oil (1,54,706 maunds), and wheat (48,285 maunds).

2. The abstract below shows, province by province, the sources of supply of the imports and the destination of the exports during the past two years. Columns are also added to show the percentage borne by the aggregate trade of each province to the total traffic of the Lower Provinces:—

5. The decrease in this trade was due to a smaller crop in the Upper Provinces, and to a falling off in the demand from the largest consumers of Bengal cotton, viz., Germany, Italy, the United Kingdom, Belgium, and Austria-Hungary. The exports to France, China, and Japan, increased considerably.

6. In the Gangetic Doab of the North-Western Provinces, where the crop is extensively grown by the aid of canal irrigation, the yield was very large, and this fact, coupled with a good demand for export to the United Kingdom and the United States, led to larger consignments from the North-Western Provinces and Oudh to Calcutta for shipment to those countries.

7. The short outturn of this crop up-country during the past year and the large demand for local consumption caused a serious fall in this trade. There was a marked decrease in the despatches to Calcutta and Bihar from the North-Western Provinces and Oudh and the Panjab, but there was an increase in those from the Central Provinces to Calcutta. In consequence of the scarcity and high prices the exports of wheat by sea almost ceased during the past year, the decrease being as much as 92 per cent.

8. The total decrease under food-grains (other than wheat) amounted to 11,33,957 maunds, or 69.96 per cent., and was due to failure of the crops all over India. The largest decline was in the imports of gram and pulse into Calcutta and Bihar from the Panjab and the North-Western Provinces and Oudh.

9. Owing to a demand in Calcutta for export, especially to the United Kingdom, the quantity of shell-lac imported from the North-Western Provinces and Oudh showed an increase of 6,650 maunds, or 67.63 per cent. The sea-borne exports from Calcutta last year were the highest recorded.

10. A brisk demand in the United Kingdom and France, coupled with a considerable fall in prices, led to larger exports of saltpetre to Calcutta from the Panjab and the North-Western Provinces and Oudh. The shipments to the United Kingdom advanced by 110.6 per cent. and are the largest on record, but those to China, Mauritius, and the Straits Settlements declined heavily.

11. The trade in oilseeds again decreased considerably, the only article showing an increase being poppy seed. Owing to the unfavourable season the area sown with oilseeds was small throughout India, and the yield was below the average. In the case of poppy seed, however, last year's outturn in the North-Western Provinces and Oudh was better than in the preceding year, and this led to larger imports into Calcutta from those Provinces for export to France. The decrease in the imports of linseed amounted to 5,74,943 maunds, and of rape and mustard seed to 12,11,478 maunds, notwithstanding that there was a demand for export by sea.

12. While the quantity of unrefined sugar imported into Calcutta and Bihar from the North-Western Provinces and Oudh was 16.24 per cent. less than in 1895-96, the imports of refined sugar into Bihar from those Provinces showed a considerable increase of 86.83 per cent. owing partly no doubt to the establishment of the Cawnpur Sugar Mills. Since the opening of the East Coast Railway the imports of refined

sugar into Orissa from Madras show a large increase, the quantity received being 11,483 maunds against 339 maunds in 1895-96. The exports of refined sugar from Calcutta to the United Kingdom revived somewhat, being 15,409 maunds, against 1,499 maunds in 1895-96.

13. The following statements show the principal articles exported during the past year in which fluctuations were most conspicuous in comparison with the figures for the previous year:—

14. After a continuous increase in recent years, this traffic received a check during the year under report, there being a heavy decrease of 30,01,359 maunds, or 21.69 per cent. This decrease was owing to a smaller demand for foreign railways, for brick-burning purposes, and for use in mills. It occurred in the exports from the Bihar and Western Bengal blocks to the North-Western Provinces and Oudh and the Panjab, and from the Chota Nagpur block to the Central Provinces, but there were increases in the consignments from the latter block to the North-Western Provinces and Oudh and Rajputana.

15. A falling off in the demand for European piece-goods in the North-Western Provinces and Oudh, due to the prevailing distress of the people, caused a decrease in the despatches from Calcutta to those Provinces, notwithstanding that the importation by sea of such goods into Calcutta last year advanced by 14.4 per cent.

16. With the view of facilitating importations from districts possessing surplus stocks to those where distress prevailed owing to high prices, the East Indian Railway Company in October 1896 considerably reduced its rates for the carriage of food-grains from the Lower Provinces to many stations up-country, and in November the lowered rates were made applicable to consignments from Howrah to stations on the Oudh and Rohilkhund Railway *via* Moghal Serai. In January 1897, the reduced rates were further extended. The reduction in railway freight, coupled with the famine prevailing in the different provinces, stimulated exports from Bengal, and there was consequently a very large increase in the despatches of all kinds of food-grains (except wheat) to the North-Western Provinces and Oudh, the Panjab, the Central Provinces and Rajputana from Calcutta, Bihar, the Western Bengal block and other places. The greatest increase was under gram and pulse (28,99,108 maunds) and rice (28,88,467 maunds). It may be noted that imports of rice into Calcutta from

coast ports increased during the year by 249·5 per cent. and were 432·7 per cent. in excess of the average of the previous four years. Of the total import of 157,252 tons (42,80,749 maunds) from these ports, 104,940 tons (28,56,700 maunds) came from Burma, and 51,522 tons (14,02,543 maunds) from Balasore. In the case of the imports of rice from Burma special through booking by steamer and by rail to stations up-country was arranged for by the East Indian Railway.

The subjoined statement shows in a concise form the total exports of all kinds of food-grains from Bengal to each Province during the past two years:—

17. A decrease is observable in the consignments from Calcutta to the North-Western Provinces and Oudh and the Panjab, Gunny-bags and cloth. and was due to absence of demand for gunnies for sacking purposes owing to the diminished traffic in grains and oilseeds.

18. The past year's figures show a considerable improvement of 38·16 per cent. over those of 1895-96, notwithstanding the fact that the outturn of lac in the Chota Nagpur Division was poor. The consignments of stick-lac from the Central Provinces to Mirzapore, the great manufacturing centre in the North-Western Provinces and Oudh, are said to have decreased, causing an increase in the exports from Bihar and Chota Nagpur.

19. There was a falling off in the supplies sent from Budgo-Budge to the North-Western Provinces and Oudh, the Panjab, Kerosine oil. and the Central Provinces, where the demand diminished, owing to the distress caused by the failure of crops and high prices.

20. There was a slight decrease in the despatches of sea-imported salt from Calcutta to the North-Western Provinces and Oudh, where the demand fell off. Salt.

21. The increase under this head was due to larger supplies having been sent from Bihar to the Central Provinces, Berar and Rajputana for local consumption. Sugar, unrefined.

22. The trade under this head showed a revival during the past year, although the tobacco crop in the Lower Provinces was about three-fourths of an average crop. The improvement occurred in the consignments from Bihar to the North-Western Provinces and Oudh and the Central Provinces. Tobacco, unmanufactured.

5. *Coal and coke*.—The downward traffic under this head showed an advance of 11·07 per cent. over the figures for the previous year, and was due to a brisk demand for export to Ceylon and Aden, and to Indian coast ports, as well as for use in mills and factories, and for brick-burning purposes. The imports of foreign coal are steadily falling off, the figure for the past year being only 8,864 tons.

6. *Cotton piece-goods (European)*.—The scarcity during the past year and the high prices that prevailed affected the trade in these goods, which fell off by 4·85 per cent., the decrease being in the despatches from Calcutta to Eastern Bengal, Dacca, Bihar, and Chota Nagpur.

7. *Wheat*.—Though the past year's trade showed a decrease of 17·15 per cent. compared with the figures for 1895-96, yet it was more than six times that of 1894-95. The trade consisted chiefly of consignments from Bihar and Eastern Bengal to Calcutta.

8. *Food-grains other than wheat*.—As was to be expected in an exceptional year like the one under review, when famine prevailed and prices ruled abnormally high, the fluctuations in the trade in food-grains were very conspicuous. The downward traffic in rice showed an increase of 134·18 per cent. and was due to large consignments from Western Bengal to Calcutta and from the Western and Northern Bengal blocks to Eastern Bengal. The up traffic also showed a marked increase of 1,730·33 per cent., owing to heavy despatches from Calcutta to Bihar, Eastern Bengal, Northern Bengal and Dacca and from Western Bengal to Bihar. In the case of paddy, while there were increases aggregating 331·55 per cent. in the exports from Calcutta to Bihar, Eastern Bengal, Northern Bengal and Dacca, and from Western Bengal to Bihar, Northern Bengal and Chota Nagpur, the supplies sent to Calcutta from Western Bengal, Eastern Bengal and Northern Bengal fell off, but those sent to Eastern Bengal from Western Bengal increased. The principal increase under gram and pulses occurred in the downward trade, which rose by 18·03 per cent. in consequence of larger exports from the Western and Eastern Bengal blocks to Calcutta; the supplies from Bihar and Northern Bengal, however, declined.

The following statement shows in a concise form the circulation of all kinds of food-grains between the different internal trade blocks in the Lower Provinces, during the past two years:—

9. *Hides*.—There was a further decline of 17·21 per cent. in the down traffic owing to smaller supplies having been sent from Bihar to Calcutta. During the last quarter of the year, Germany, Italy, France, and Spain prohibited the importation of raw hides from India on account of the plague in Bombay and Karachi, and this, no doubt, accounts for the contraction of this trade.

10. *Jute, raw*.—Owing to a smaller outturn and to the inferior quality of the fibre and higher prices compared with previous years, the imports of jute into Calcutta from the Northern Bengal, Dacca, Western Bengal and Bihar blocks showed a decrease of 7·29 per cent. The exports by sea also declined by 4·7 per cent.

11. *Iron*.—There was a considerable recovery in the trade in iron, the increase being so much as 103·91 per cent. compared with the figures of the previous year. The improvement occurred in the consignments from Calcutta to Bihar, Eastern Bengal, Northern Bengal and Dacca.

12. *Kerosine oil*.—Under this head the increase in the up traffic was 36·12 per cent., and was due to larger consignments from Calcutta to Eastern and Northern Bengal, and from Eastern Bengal to Bihar. Prices in Calcutta last year were more favourable than in previous years, and this perhaps led to larger importations by dealers for storage and sale.

13. *Oil-seeds*.—The oil-seeds crop in Bihar during the past year was better than in 1895-96, and consequently the imports into Calcutta of linseed and mustard seed showed an improvement. There was an increase of 38·16 per cent. in the imports of linseed into Calcutta from Bihar and Western Bengal, and the supplies of mustard seed sent to Calcutta from Bihar, Eastern Bengal, Northern Bengal and Dacca also showed a very large increase, of 217·62 per cent. There was a good demand for mustard seed from Belgium and Germany.

14. *Salt*.—The quantity of salt carried upwards showed an advance of 17·11 per cent., the increase being shared by the Bihar, Western Bengal, Eastern Bengal, Northern Bengal, and Dacca blocks.

15. *Saltpetre*.—Owing to a larger outturn and to a demand for export, chiefly to the United Kingdom, the quantity drawn by Calcutta from the Bihar block showed an increase of 12·97 per cent.

16. *Sugar.*—There was a decrease of 25·79 per cent. and 20·07 per cent. in the quantity of refined sugar carried upwards from Calcutta to Western Bengal and Northern Bengal, respectively. The downward traffic in unrefined sugar also fell off by 17·24 per cent., chiefly owing to smaller despatches from Eastern Bengal to Calcutta, and from Bihar to Western Bengal and Eastern Bengal.

17. *Tobacco, unmanufactured.*—The past year's trade shows an improvement of 8·44 per cent. on the figures for 1895-96, and was due to larger supplies from Northern Bengal to Calcutta and Western Bengal. There was a very large demand for tobacco in the leaf from Holland; large quantities were also shipped to Burma for home consumption, and also for re-importation into Bengal in the manufactured form of cigars.
